

Pfizer Anti-Infectives Driving Global Innovation

OUR VISION:

We are committed to confronting the global challenges of infectious diseases through active stewardship, global policy leadership, providing access to innovative surveillance tools and delivering a diverse portfolio of medicines to treat patients with serious infections around the world.

ANTIMICROBIAL RESISTANCE (AMR) IS ON THE RISE AND IS A CRITICAL GLOBAL PUBLIC HEALTH ISSUE

700K deaths annually  **10M** deaths by 2050

exponential growth forecasted in annual AMR deaths without intervention¹

1 in **18** 

hospital patients in the EU will develop infection requiring treatment²

fewer new antimicrobial agents being developed³

02.16.17
WHO Publishes List of Priority Pathogens

WHO list of antibiotic resistant pathogens posing greatest threat to human health⁴

Antibiotic Resistance Leads to Increased Mortality, Longer Hospital Stays, Higher Medical Costs & Loss of Productivity

ANNUAL EU IMPACT⁵

25K deaths

Due to multidrug-resistant bacteria

€1.5B

health service cost

600M days

lost productivity
